

OZONE DEPLETING SUBSTANCES POLICY STATEMENT

RCD's policy is to meet all present and future national and international statutory requirements; and to regularly and continuously improve the performance of our products, processes, operations and distribution systems, with respect to the health and safety impact on our employees, the public, and our environment.

In particular, to control or eliminate ozone depleting substances (ODSs) release into the atmosphere. The Montreal Protocol (1987) together with the London (1990), Copenhagen (1992), Montreal (1997), Beijing (1999) and North American (2014) Amendments, are all intended to severely forbid (CFCs) and restrict (HFCs) ozone depleting substances through 2050.

RCD certifies our products are not, nor have ever been, manufactured with, or contain, ODSs.
