

CERTIFICATE OF COMPLIANCE

RCD Persistent Organic Pollutants (POP) Statement (EC) No. 2019/1021 Annex I and Annex III - IV

The European Parliament and Council published EC Regulation 2019/1021 as of June 20th, 2019, regarding the subject of persistent organic pollutants, in particular, to protect human health and the environment from these substances by prohibiting, phasing out as soon as possible, or restricting the production, placing on the market and use of substances subject to this directive; and by minimizing, with a view to eliminating where feasible as soon as possible, releases of such substances, and by establishing provisions regarding waste consisting of, containing or contaminated by, any of these substances.

Regulation (EC) No 850/2004 of the European Parliament and of the Council (3) had been substantially amended several times and, with these further and continuing amendments, that Regulation had been recast in the interests of clarity.

RCD declares that none of the POP substances in (EC) No. 2019/1021 Annex I and Annex III-IV, are present in any quantities, in our standard products described on the RCD website: www.RCDcomponents.com.

Please contact RCD directly (rohs@rcdcomponents.com) if you have any questions regarding this certification.
