* In order to operate at maximum wattage and current ratings, a suitable substrate or PCB design is required to carry the current and drain the heat. Heavy Cu, large pads and traces, and/or multilayer PC boards are recommended. MLB2512 has a 3W rating when used with 300mm² x 0.0056 Cu pads.

** Varies with resistance value (lower values typically have thicker bodies and wider termination pads for increased current carrying capability).
